MURATHAN SERTEL PRODUCT DESIGNER

I'm Murathan SERTEL !

My productive , innovative and creative character traits have always conducted me to produce and design new products and I'm Happy to realize my dream of becoming a Product Designer.

## Workstation III

Workstation III was developed to meet the demand for maximum performance and balanced heat dissipation. It is made of case aluminum material, supporting 360 liquid-cooled radiator and ultra-long ATX PSII power supply. Front panel USB Type-C connector and liquid cooling rack provide more convenience.

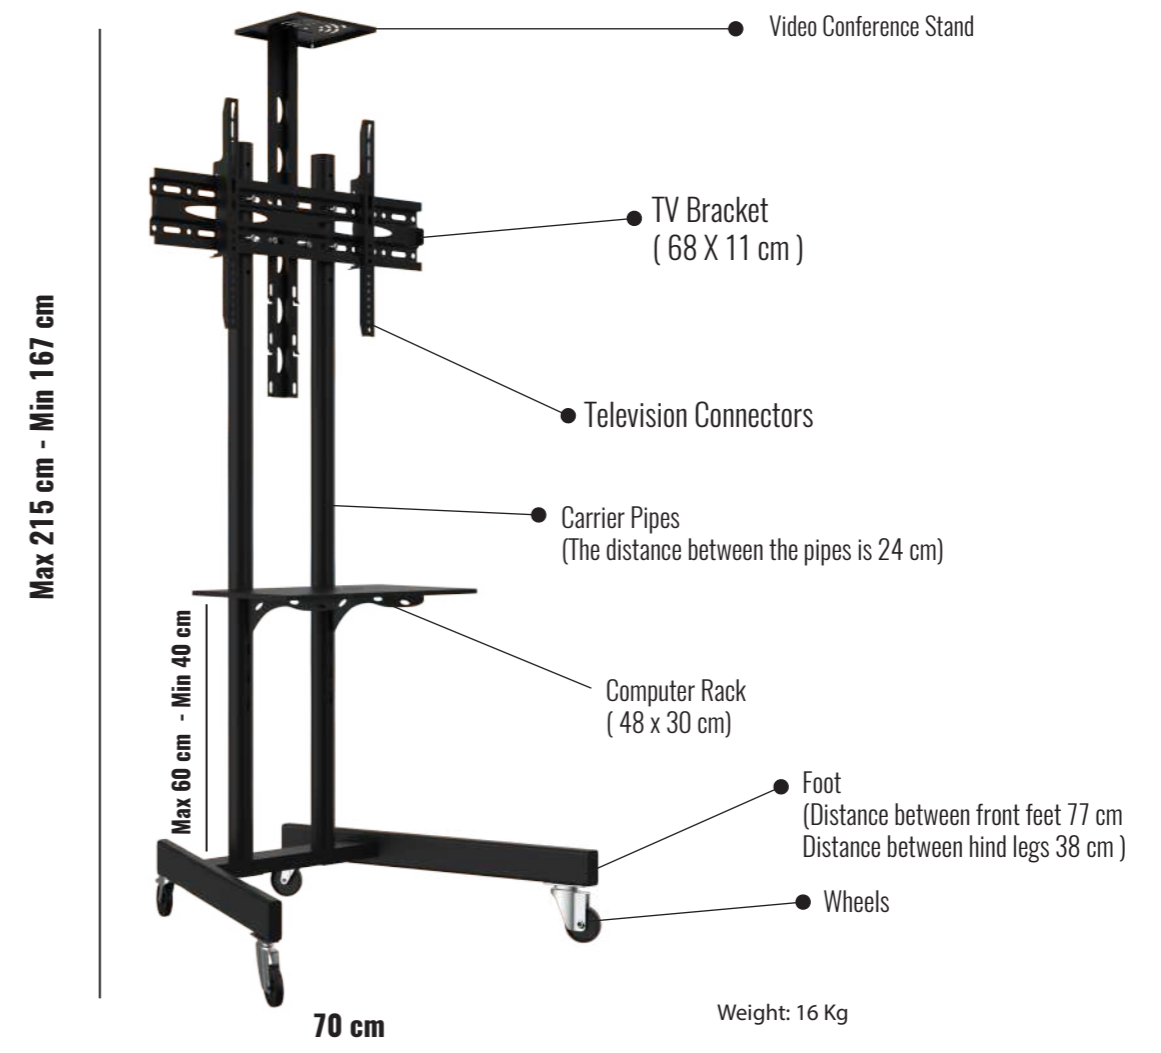

Workstation III supports the hardware that the user may need with its functional case size, cooling performance and specially designed hardware connection equipment. It provides the user with maximum performance and hardware support with minimum chassis size.

# WORKSTATION III

**TV & Video Conferance Stand**

Shelf length of Alpin TV/Computer and Video Conferencing Unit  
It can be adjusted so that it provides you the most suitable viewing distance.

Alpin TV/Computer and Video Conferencing Unit, 40", 42",  
44-inch, 46-inch, 50-inch, 55-inch, 60-inch, and 65-inch televisions  
Suitable for screens.

**Gaming Computer Case**

Alpin Gaming PC, Unique and exciting exterior design and functional interior design meet all the needs of the user. Alpin Gaming PC has a comprehensive cable management system. Allows convenient installation of cables. All that remains is to win the game.

Below the power supply are mounting hardware for hard drives. Four individually removable HDDs can be used to install 3.5" hard drives. 3.5" drives can be installed on the top. Another feature of the Alpin gaming computer that makes a difference from other cases is the ability to use 2.5" SSDs screwed from the bottom at the same time. At the bottom of the case, there is another mounting place where an SSD can be installed.
